Our 17 year history assures best practice in privacy, security and the ethical use of data

We all have a responsibility to use data for good

Privacy

- We have built our business based on privacy by design principles for the past 17 years
- Quantum has strict protocols around the receipt and storage of personal information
- All information is de-identified using an irreversible tokenisation process with no ability to re-identify individuals.

Security

- We are ISO27001 certified - internationally recognised for our ability to uphold best practice standards across information security
- We use 'bank grade' security to store and process our data
- Comply with 200+ security requirements from NAB, Woolworths and other data partners
- All partner data is held in separate restricted environments
- All access to partner data is limited to essential staff only
- Security environment and processes regularly audited by our data partners.

Ethical use of data

Applies to all facets of our work, from the initiatives we take on, the information we use and how our solutions impact individuals, organisations and society.

Quantum believes in using data for progress, with great care and responsibility. As such please respect the commercial in confidence nature of this document.

Executive summary

01 Task 1

Key Insights

- Older Families were the highest spending customer segment.
- Mainstream Young Singles/Couples showed strong premium-brand purchasing behaviour.
- Kettle, Smiths, Doritos and Pringles were the top-performing brands.
- 150g and 175g packs were the most purchased pack sizes.
- Family segments purchased more frequently and in larger quantities.

Recommendation

- Focus promotional activity on Older Families and Mainstream Young Singles/Couples.
- Maintain strong visibility for Kettle, Doritos and Smiths products.
- Prioritise popular 150g–175g pack sizes in promotional campaigns.

02 Task 2

Key Insights

- Store 77 showed the strongest and most significant sales uplift.
- Store 86 showed moderate improvement during the trial period.
- Store 88 showed no meaningful positive uplift.
- Trial performance was assessed using matched control stores and pre-trial sales behaviour.

Recommendation

- Consider rolling out the Store 77 trial layout to similar stores.
- Review Store 88 execution before broader implementation.
- Continue using controlled trials to evaluate future retail initiatives.

Objectives

Context

The chips category team required customer and trial-store insights to support strategic planning for the next half year.

The analysis aimed to:

- identify the most valuable customer segments within the chips category,
- understand purchasing behaviour and brand preferences,
- evaluate whether trial store layouts improved sales performance.

Business Goal

Support data-driven decisions for the next half-year category strategy.

Agenda

01 Customer & Category Insights

- Customer segments
- Brand performance
- Purchasing behaviour

02 Trial Store Performance

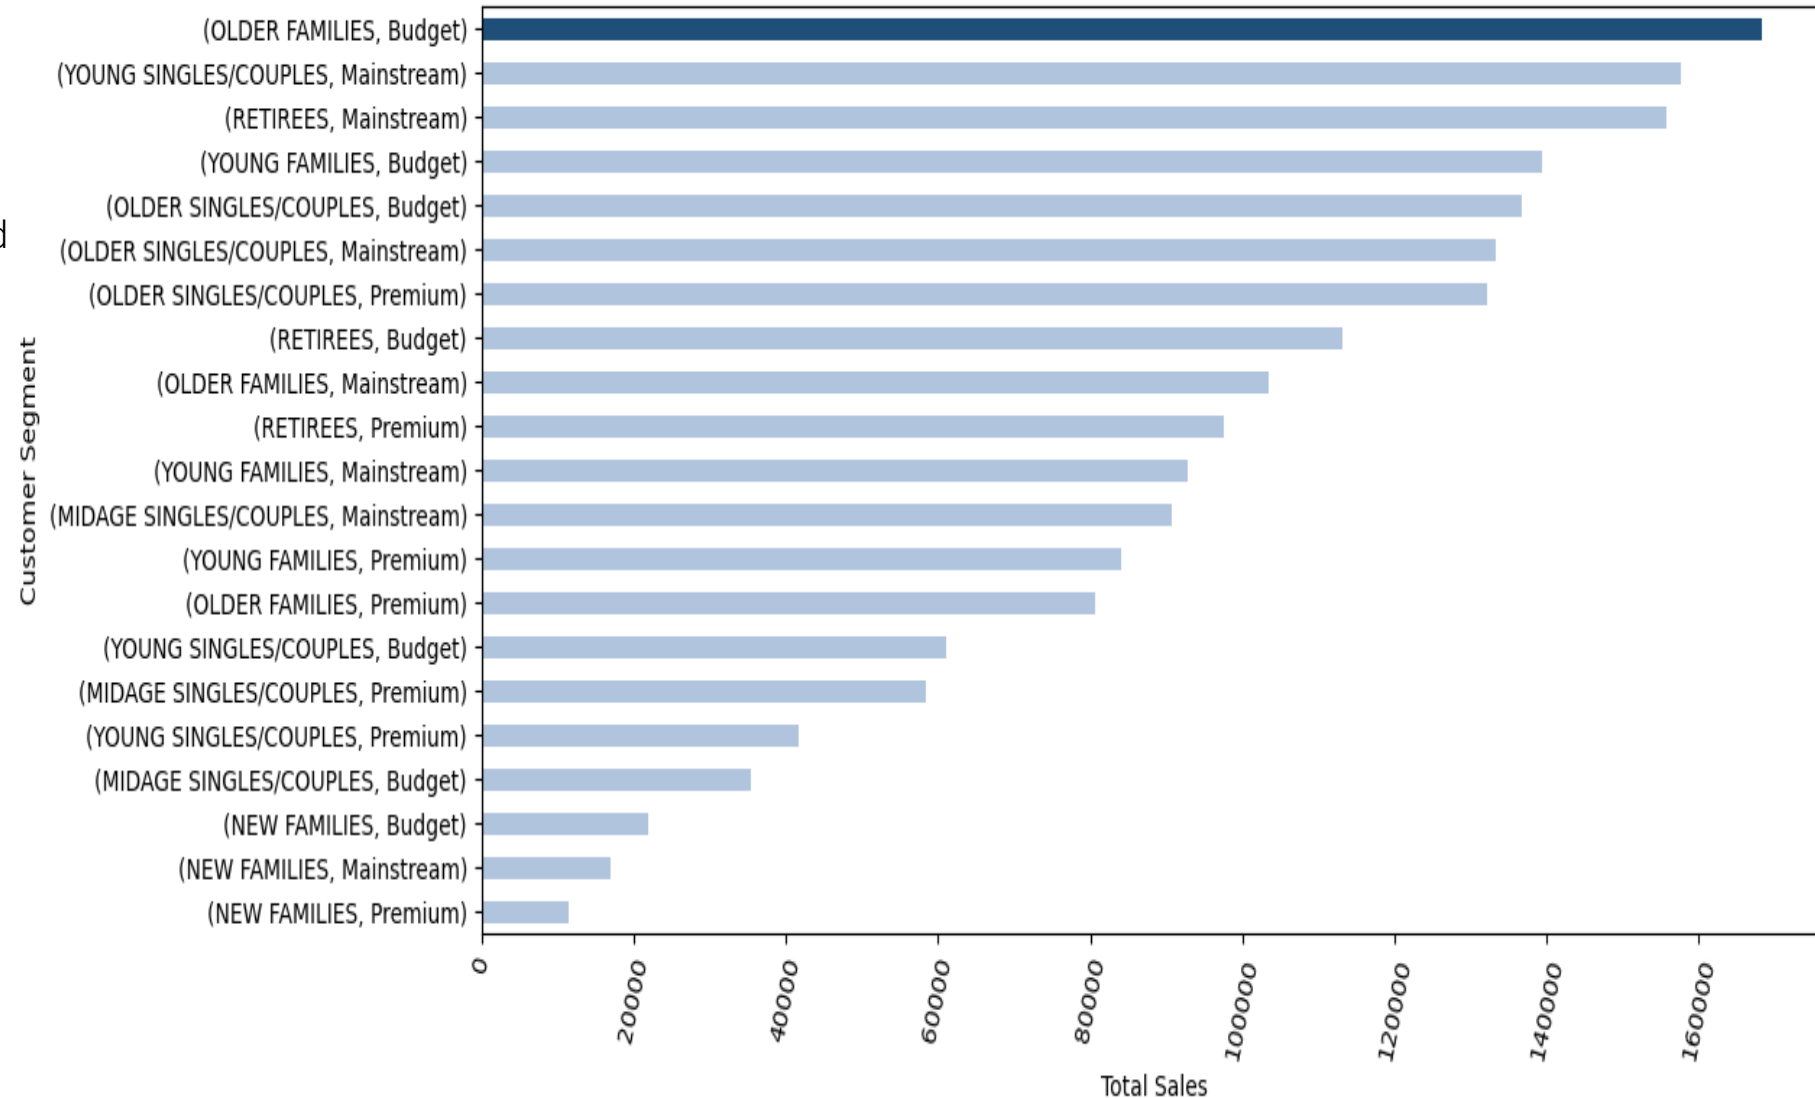

- Control store methodology
- Trial uplift analysis
- Strategic recommendations

01

Customer and Category Insights

Older Families Drive Category Sales

Total Sales by Customer Segment

Key Insights

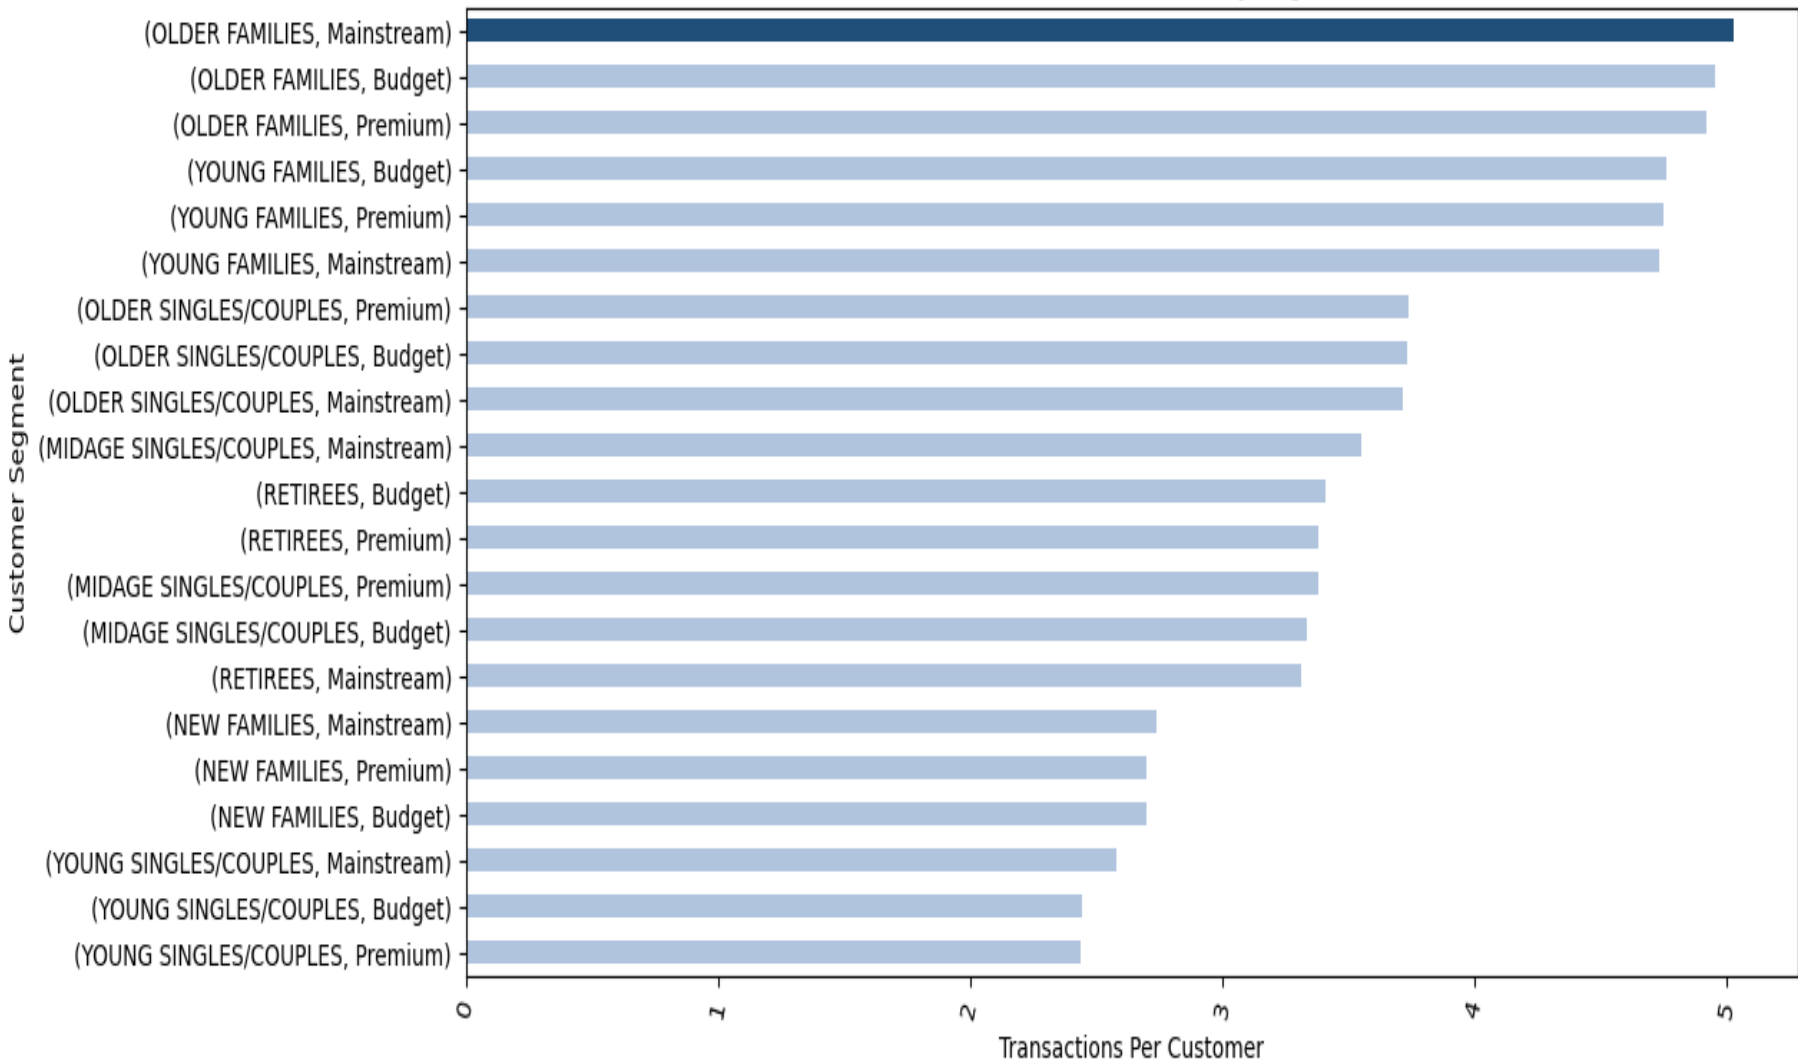

- Older Families Budget generated the highest category sales.
- Young Singles/Couples drove high customer volume.
- Family segments purchased more frequently.

Recommendation

- Prioritise family-focused promotions and premium snack positioning.

Customer Purchasing Behaviour

Transactions Per Customer by Segment

Key Insights

- Older Families showed the highest purchase frequency (~5 transactions/customer).
- Family segments purchased more frequently.
- Young Singles/Couples showed stronger premium purchasing behaviour.

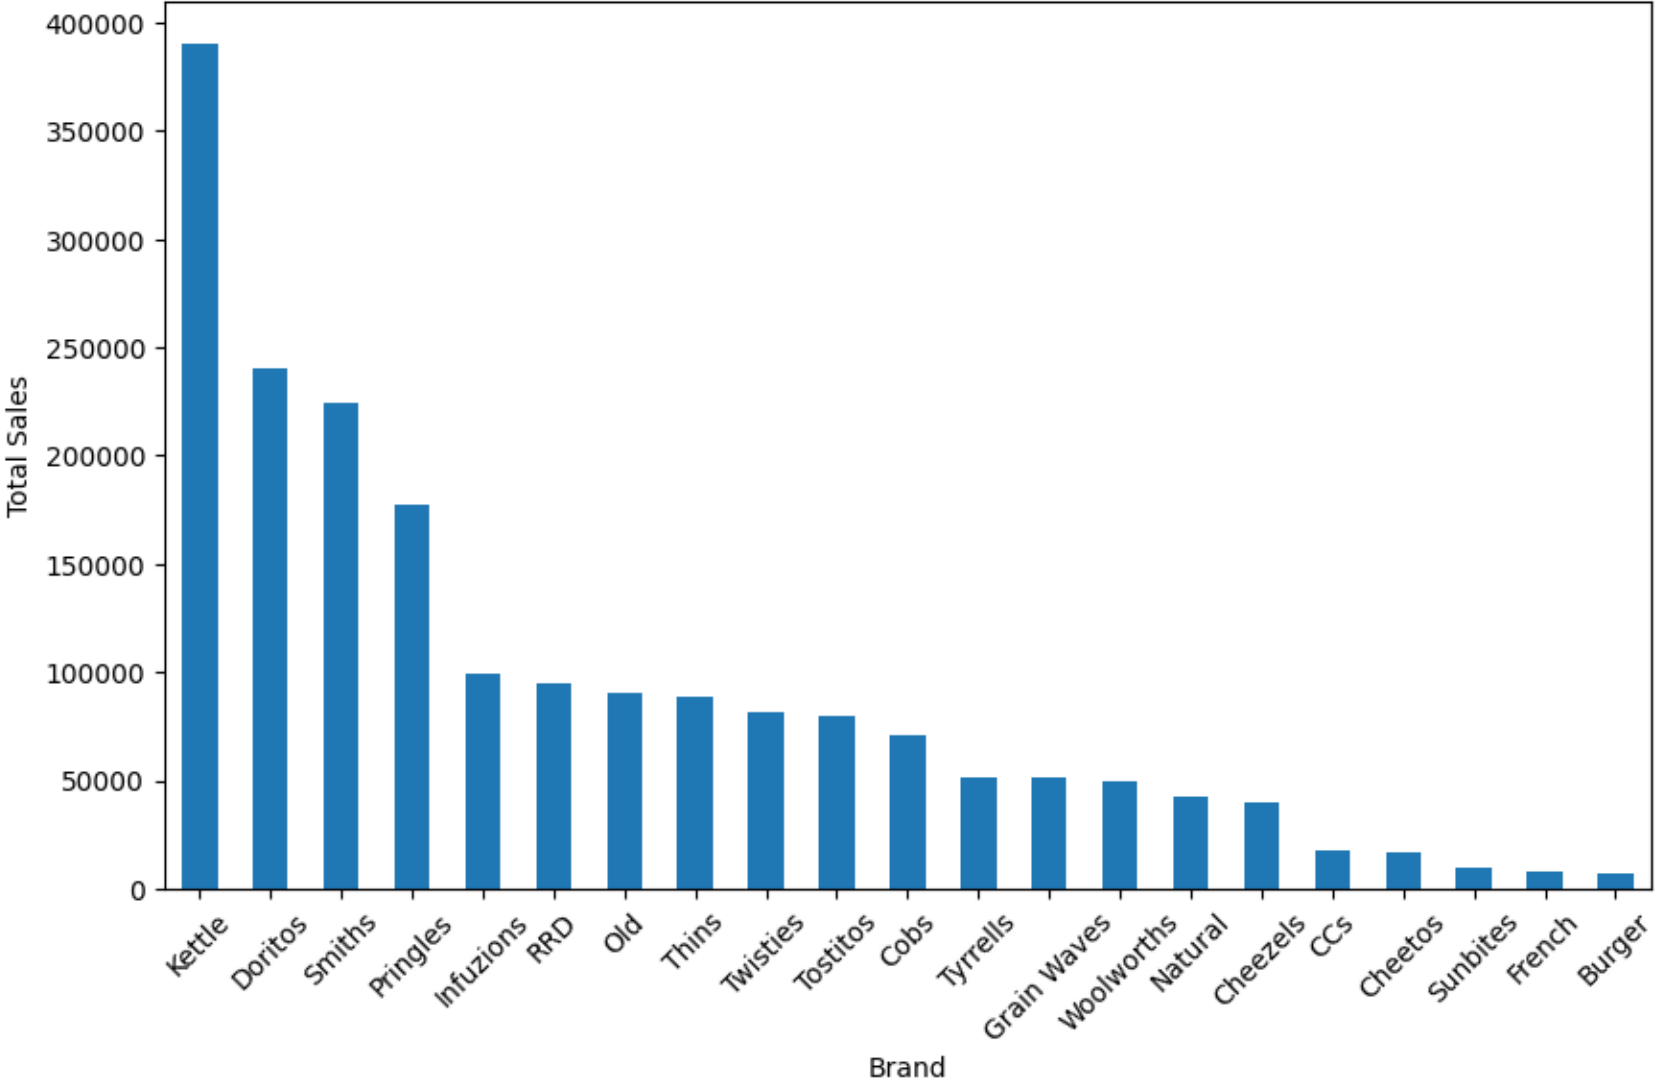

Recommendation

- Focus loyalty offers and multi-buy promotions on family-oriented segments.
- Maintain premium product visibility for younger shopper segments.

Brand Preferences

Based on total sales

Total Sales by Brand

Key Insights

- Kettle generated the highest total sales across the category.
- Doritos and Smiths also contributed strongly to overall category performance.
- Kettle, Doritos and Smiths dominated category sales.

Recommendation

- Maintain strong promotional visibility for Kettle, Doritos and Smiths.
- Use leading brands to drive category traffic and promotional campaigns.

Brand Preferences

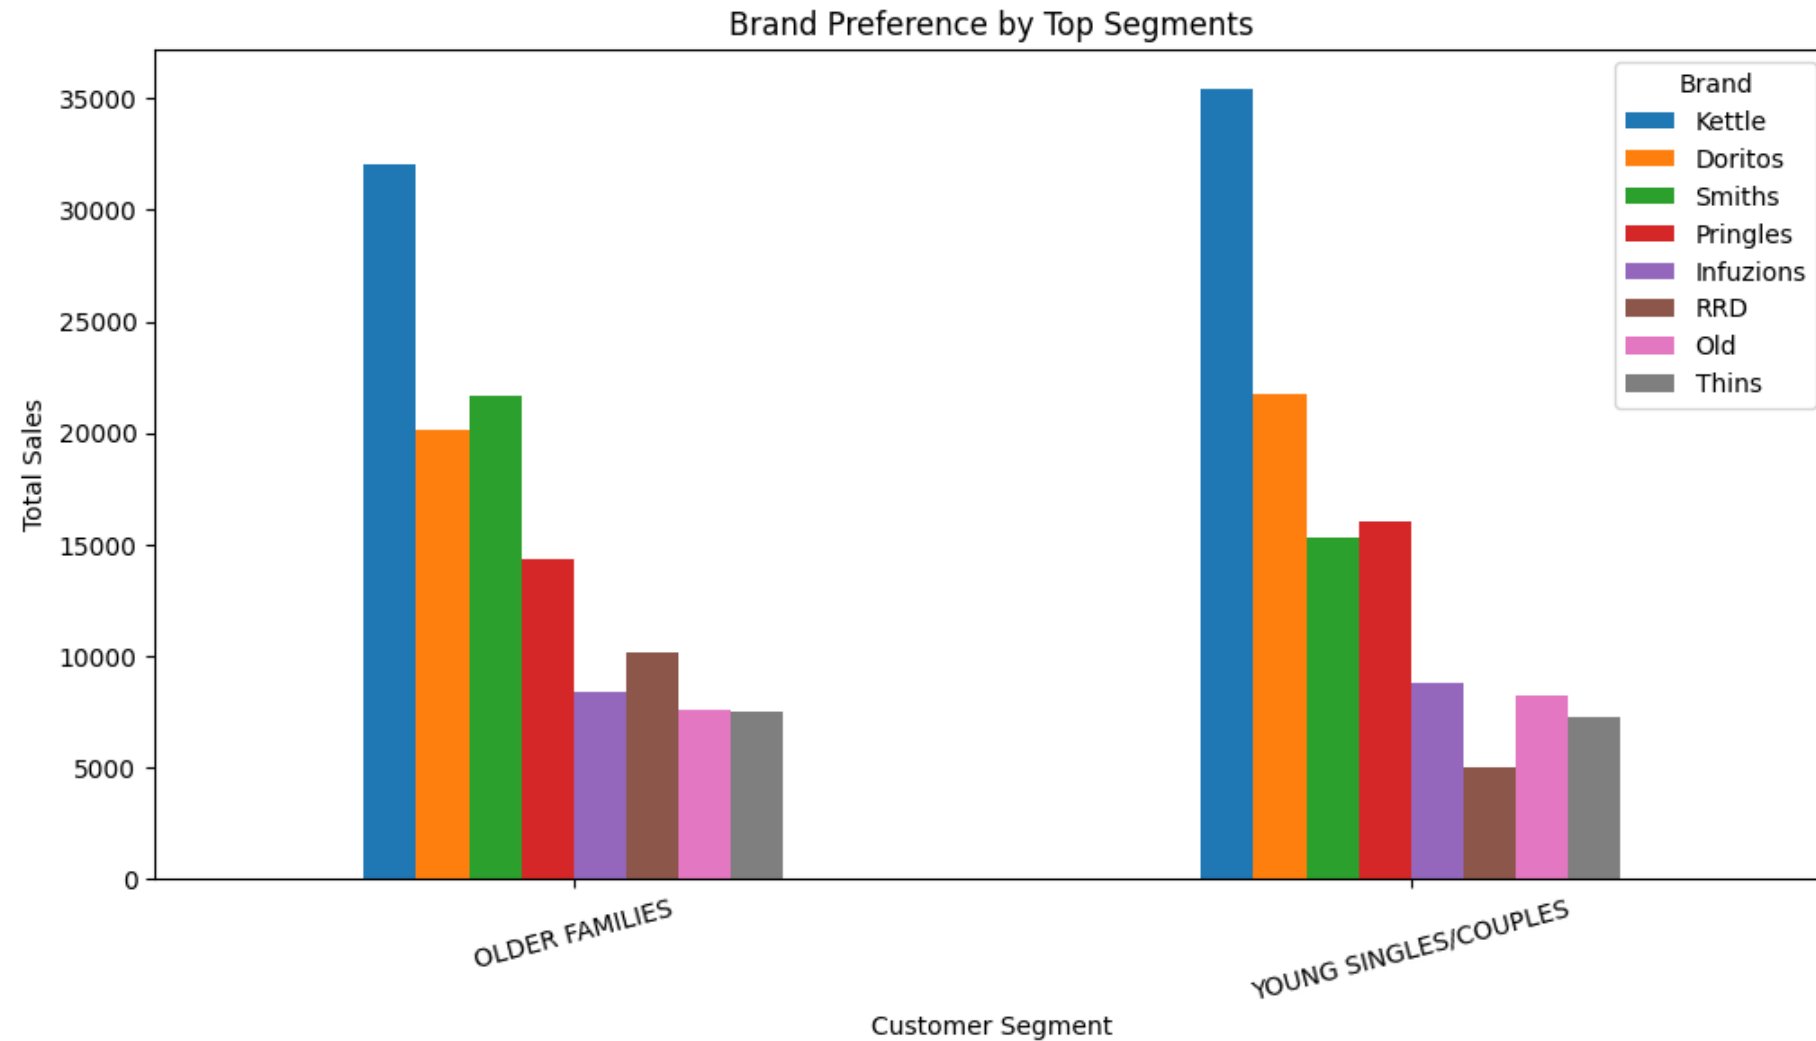

By Top segments

Key Insights

- Kettle dominated Brand performance across both major customer segments.
- Young Singles/Couples demonstrated stronger premium purchasing behaviour.
- Older Families showed broader purchasing across mainstream brands such as Doritos and Smiths.

Recommendation

- Promote premium brands to younger shopper segments.
- Use family-focused multi-buy promotions for mainstream brands.

Purchasing Per Unit Quantity

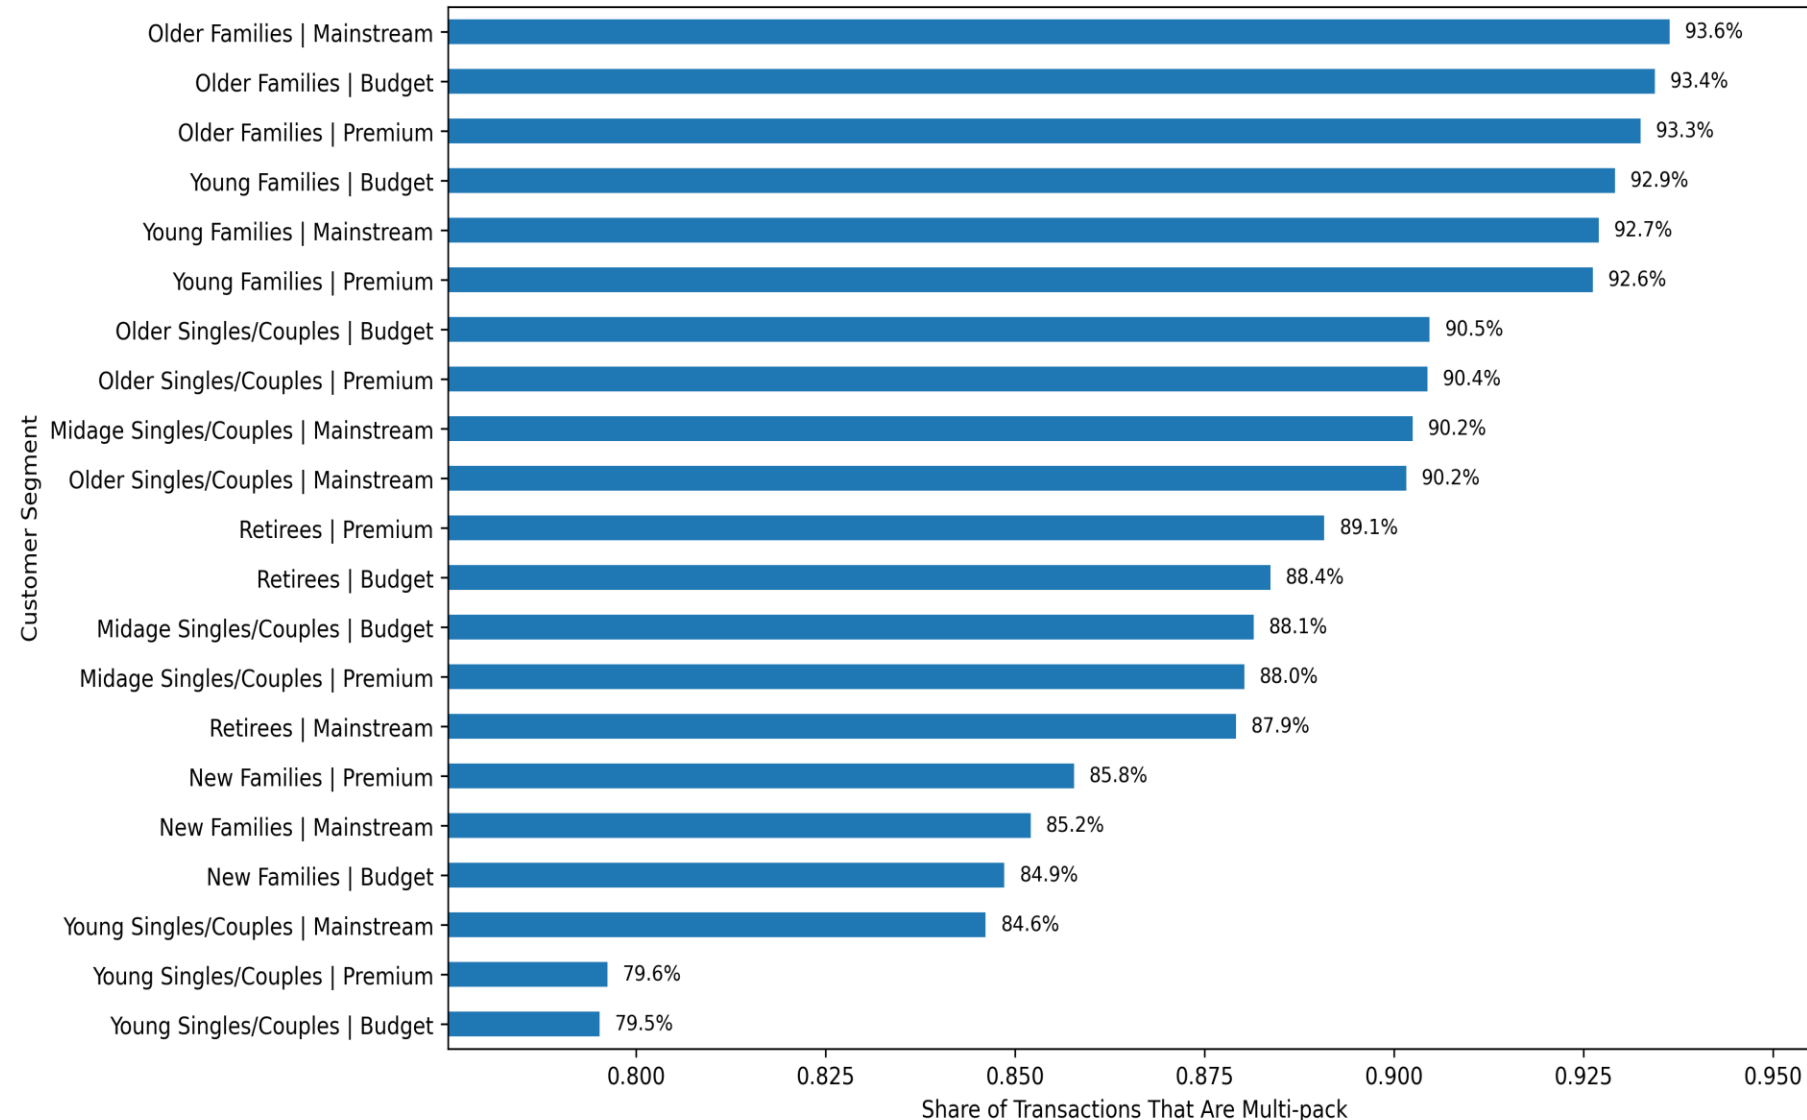

Key Insights

- Multi-unit purchasing behaviour was strongest among family-oriented segments.
- Older Families contributed heavily to category sales through larger basket sizes.
- Younger segments purchased smaller quantities per visit and shopped less frequently than family-oriented segments.

Recommendations:

- Prioritise family-focused multi-buy offers and larger pack promotions.
- Tailor smaller promotional bundles toward younger shopper segments.

Multi unit Purchase Rate by Customer Segment

Mid-Sized Pack Sizes Drive Category Demand

Pack Size	Relative Performance	Customer Insights
175g	Highest sales volume	Popular across all segments
150g	Strong demand	Preferred everyday pack size
Larger Packs	Moderate demand	Most common among family segments

Key Insights

- 175g and 150g packs generated the strongest overall demand.
- Mid-sized packs performed consistently across customer groups.
- Larger pack formats were more commonly purchased by family-oriented shoppers.

Recommendation

- Prioritise 150g–175g pack sizes in promotional campaigns and shelf placement.
- Use larger pack offers selectively for family-focused promotions.

02

Trial store performance

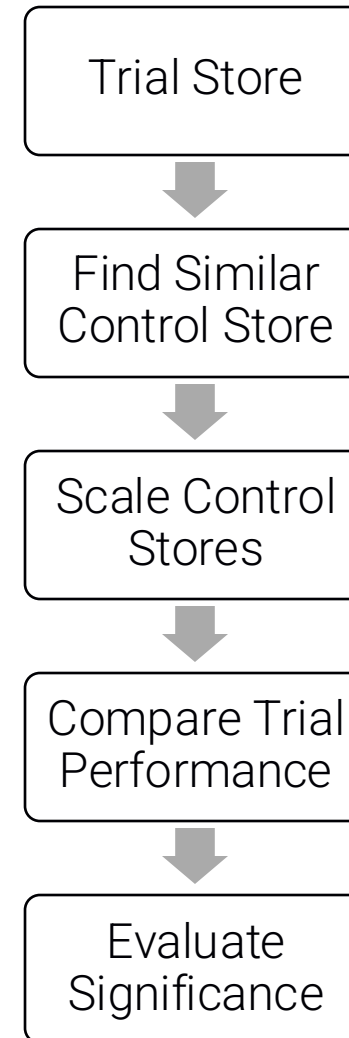

Trial Store Methodology

Control Store Selection

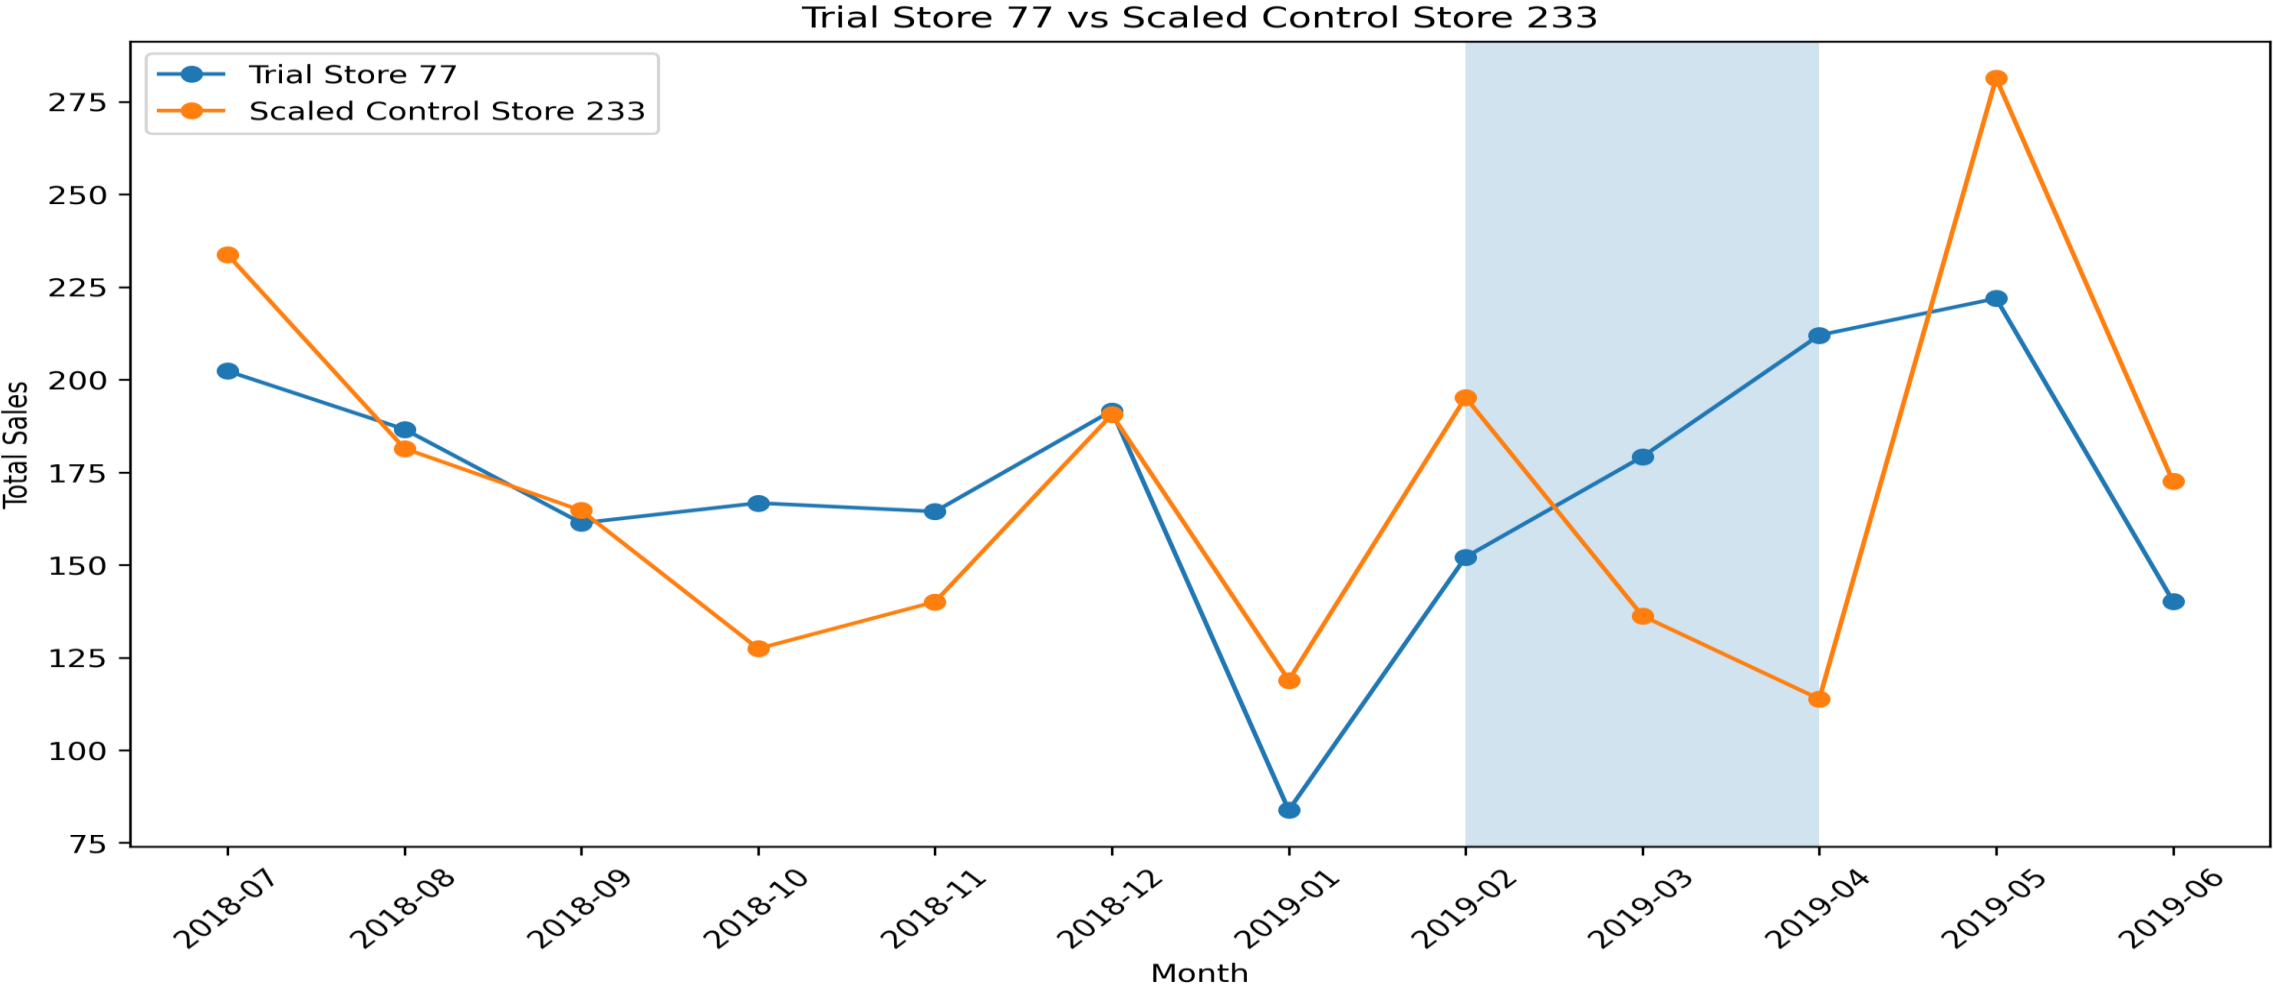

- Control stores were selected using:
- monthly sales correlation
- customer trend similarity
- sales magnitude comparison

•Trial Assessment

- Scaled control stores were compared against trial stores during February–April 2019 to evaluate sales uplift and statistical significance.

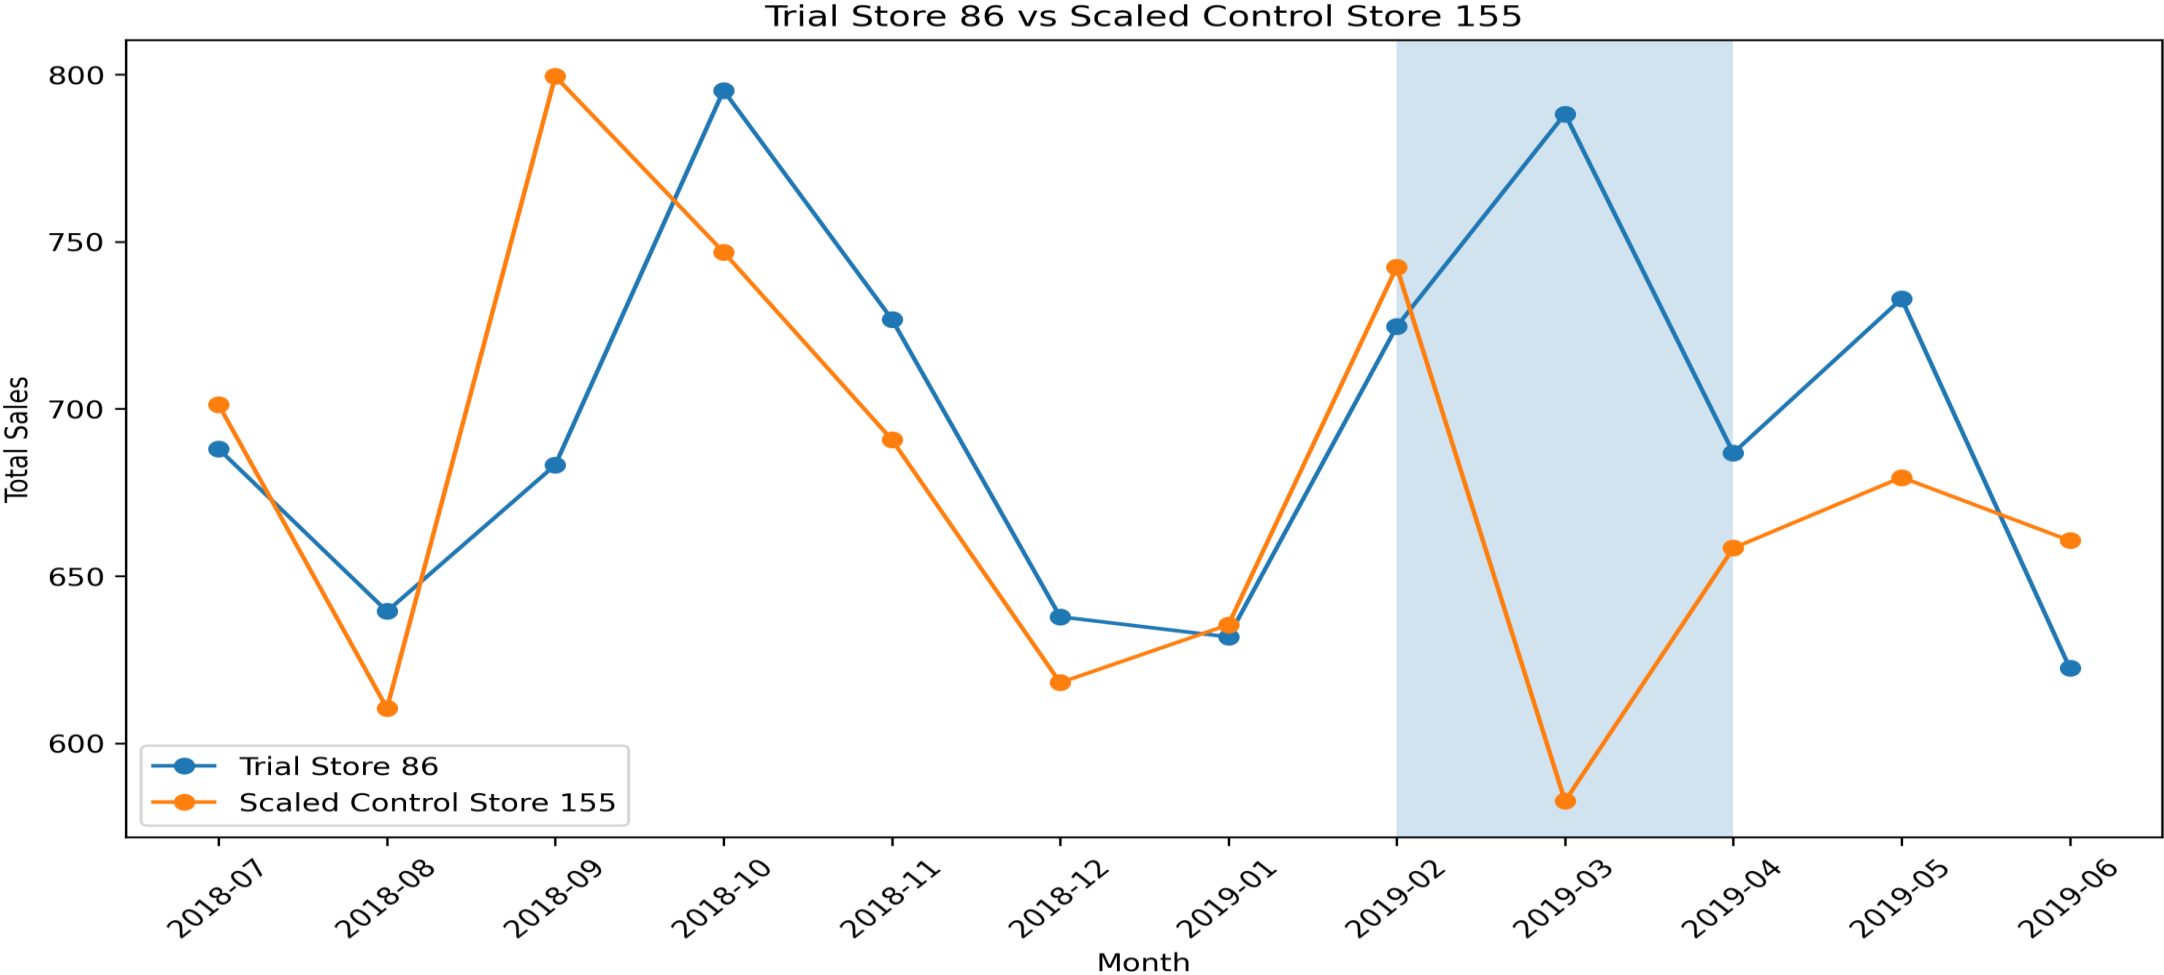

Trial Store Performance Comparison

Store 77

Sales uplift became clearly visible during the trial period, indicating successful trial performance.

Trial Store Performance Comparison

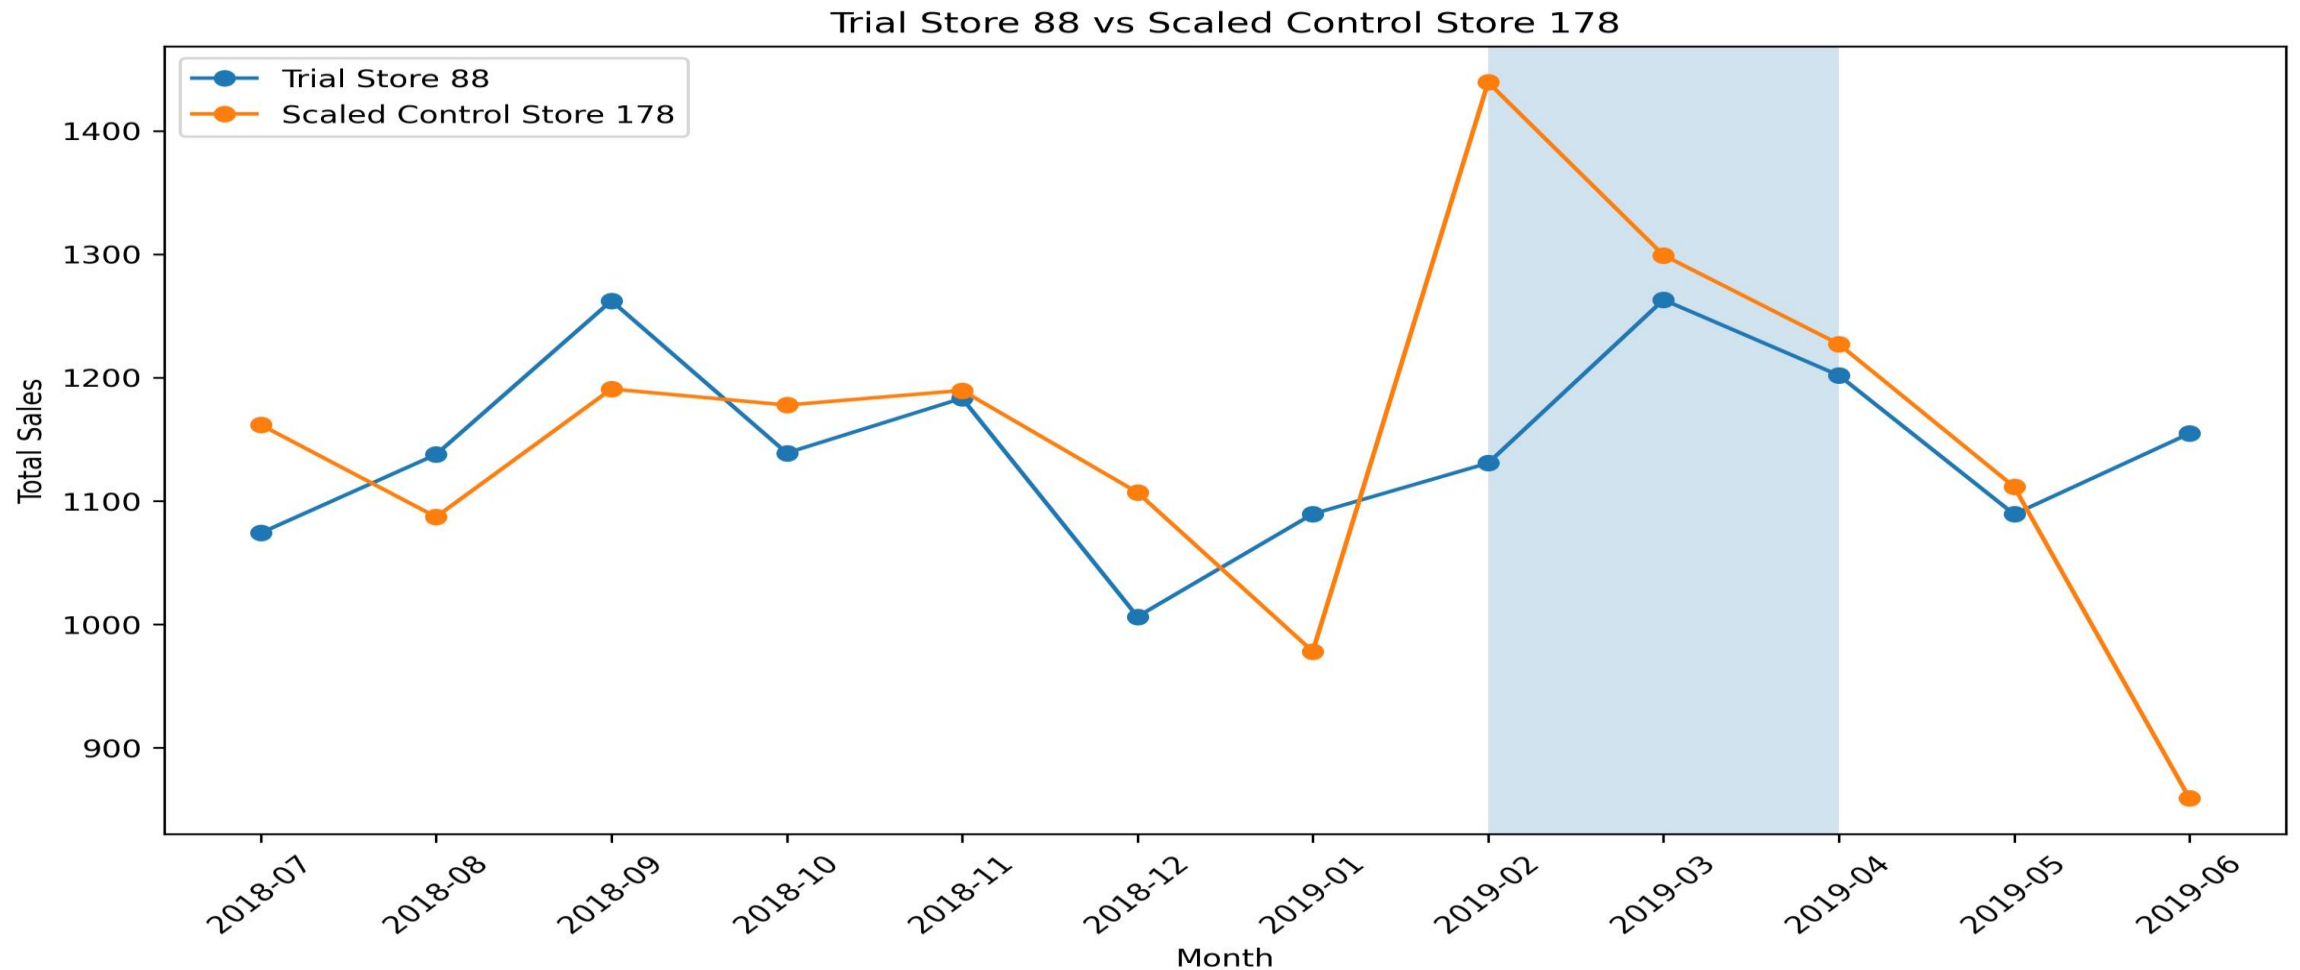

Store 86

Moderate uplift was observed, although performance remained less consistent.

Trial Store Performance Comparison

Store 88

Sales underperformed the scaled control store during the trial period, resulting in a net negative average effect of -4.8%.

Statistical Significance Results

Trial Store	Control Store	Average Uplift	Significance	Recommendation
77	233	+31.0%	Yes	Rollout Recommendation
86	155	+13.6%	Partial	Further Testing
88	178	-4.8%	No	Do not Rollout

Key Findings

- Store 77 showed the strongest and most consistent statistically significant uplift.
- Store 86 showed temporary uplift but inconsistent significance.
- Store 88 did not demonstrate meaningful positive uplift.

Final Recommendations

Customer Strategy

- Focus marketing toward Older Families and Mainstream Young Singles/Couples.
- Continue promoting premium products to younger shopper segments.

Product Strategy

- Prioritise Kettle, Doritos and Smiths in promotional campaigns.
- Increase emphasis on high-performing pack sizes and multi-buy offers.

Trial Store Strategy

- Consider broader rollout of the Store 77 layout strategy.
- Conduct further testing before wider rollout of Store 86.
- Do not expand the Store 88 layout without further investigation.

Proposed Next Steps

Immediate Actions

- Roll out Store 77 layout to comparable stores.
- Investigate operational and merchandising issues in Store 88.
- Align promotional planning with December seasonal demand peak.

Longer-Term Opportunities

- Continue controlled store trials for future category initiatives.
- Monitor customer response across family and younger shopper segments.
